# Order to Cash Manager

For use with SAP® R/3®

## Highlighting Order Types

In order to draw attention to specific order types, cell coloring can be used. In the following example, order type ZR1 is colored bright red and order type ZR2 is colored light red.

The screenshot displays the SAP Order to Cash Manager interface. The main window shows a table titled "All Sales Order Items". The table has columns for Sales doc., Item, On Time, Bill rel, Item statu, Credit sta, Div bi, Bill bi, Output, Reject, Doc. date, Created, ATP, Cp Div, SOrg, SOff, SGrp, CGrp, SaTy, and Sold-to pt. The table contains multiple rows of data, with some rows highlighted in red and others in light red. The highlighted rows correspond to order types ZR1 and ZR2.

Sales doc.	Item	On Time	Bill rel	Item statu	Credit sta	Div bi	Bill bi	Output	Reject	Doc. date	Created	ATP	Cp Div	SOrg	SOff	SGrp	CGrp	SaTy	Sold-to pt

# Order to Cash Manager

For use with SAP® R/3®

## Sample Program Logic

To accomplish this requirement, logic needs to be added to `userexit_create_output_order`. The field catalog contains the field `COLOR`. This field is an internal table that contains one row for each cell in the structure that is to be colored. The logic below checks to see if a record exists for the field. If so, the color is changed. If the field does not exist, it will be appended. In the case of the order number, the field would already exist because the standard program colors this field blue by default.
